<p style="text-align: center"><u>Minutes of the meeting of group 6</u></p>

Project title: Group 06 Project

Meeting Purpose: Issue what people were going to initially look at.

People Present: Laura Collins, James Euesden, Jack Roden, Richard Addicott, Alex Hardy, Karl Birch, Chris Loftus, Michael Kitchen

People Absent: Shane Morgan

Place: C55

Date 4:10pm Tuesday 29th October

Author: Alex Hardy

<u>Matters Arising</u>
Pro's and cons of open street maps and google maps. Karl and James has now both decided that the other person ideas on the maps were better. Karl stated that it might be easier to use google maps as this would have to be used for the android application.
James though that the open street had more library support and visually looked better.
Need to pick one to keep the work load to a minimum.
Google has a feature that allows a map to be altered by a user if they find there is a problem with the map. However another user this to verify this fix.
Street maps also has this feature however there is no need for verification.
It was decided that a decision was not needed to be made on this yet.

Theme
Main idea suggested was scenic/ interesting places/ monuments. Ideas briefly mentioned where supermarket and pubs although the quantity of supermarkets and the fact another group where also doing pubs where seen as a downside to this idea. Once we have settled on a theme a logo and group name need to be decided.
Jack has done a few designs for a logo.

Project plans where looked at and it was pointed out that both had good and bad points. Gantt chart should only be one page not three like on one of the reports. This deadline is next Tuesday.

Test Specification
Alex reported back on SE.QA.06. It had requirements that we need to follow. There are two types of testing module testing and System testing. Module is mainly done by the coders with a set of Junit tests. System tends to be done by people outside the system to test that the whole package works. Test specification deadline is 11th November. Alex to split up the writing of parts between himself, Richard and Michael.
ACTION:alh35

Jack design
Jack has got it saving pictures to storage and saving the GPS coordinates to a save file and the name of the picture.

Project Plan

This is going to be written by Laura, Shane and Jack. There is nine parts and so they are going to write three parts each.

Jack will write:

SE_06_PP_01 Introduction, SE_06_PP_04 Use--Cases, SE_06_PP_05 User--Interface Design

ACTION: Jar55

Laura will write: SE_06_PP_03 Organisation of Tasks , SE_06_PP_07 Gantt Chart, SE_06_PP_08 Risk Analysis .

ACTION: lac32

Shane will write: SE_06_PP_02 Overview of Proposed System, SE_06_PP_06 Hardware and Software resource requirements, SE--06_PP_09 Monitoring and Reporting Mechanisms

ACTION: shm22

Drafts of sections to be done for a meeting on Thursday. Needs to link up with what is in the requirements document.

Blog posts

These need to be done weekly. Michael needs to set one up on Word-press that we used last year.

ACTION: mjk5

New Business

Due to James no longer attending the GIT help it has been decided that he will take over as deputy leader of the group leaving Alex just in charge of testing.

Document consistency needs to be looked at. Latex was decided on. The whole group needs to get familiar with it.
